THOR-Plex™ - Male Enhancement Formula

Additive-Free Dietary Supplement

Enhance Your Strength, Size, Appearance and Staying Power!

THOR-Plex™ is formulated to naturally improve male health and performance. Benefits may include: energy, harder erections, increased testosterone, improved circulation, potency, stamina, and improved overall well-being. Each serving contains: Ginkgo Biloba Extract (120 mg.), L-Arginine (1,000 mg.), L-Glutamine (500 mg.), Muira Puama (500 mg.), Tribulus Terrestris (750 mg.), and a Proprietary Blend (75 mg.) which includes Damiana, Saw Palmetto, and Panax Ginseng.

Ginkgo Biloba

The Ginkgo is the oldest living tree species and one of the most well researched herbs in the world. Numerous studies have demonstrated the incredible benefits Ginkgo provides the entire body. It works by increasing blood flow to the brain and organ systems. Ginkgo improves erectile function by increasing circulation and blood flow to the penis. Benefits of improved circulation to the brain include improved memory and increased mental clarity. Ginkgo may enhance vitality levels, improve circulatory health, relieve tension and stress, elevate mood and restore energy. [Note: Many libido problems are linked to anxiety, stress, and tension.]

L- Arginine

Arginine is the amino acid responsible for the proper release of growth hormone from the pituitary gland. As Arginine breaks down, it creates Nitric Oxide or NO. Nitric Oxide increases blood flow and carries nutrients to the muscles promoting muscle growth and increased strength. It also reduces inflammation relieving muscle pain and speeding recovery from exercise. NO is the chemical messenger that produces hard erections by dilating the blood vessels to penile erectile tissue. Nitric Oxide is also used by the immune system to fight viral, bacterial, parasitic infections, and tumors. Arginine also helps to metabolize stored fat and tone muscle tissue.

L-Glutamine

Glutamine is the most abundant amino acid found in muscle tissue. The benefits derived from supplementing with Glutamine are numerous. It helps to repair and build muscle, aids in protein synthesis, increases Growth Hormone levels, restores glycogen, which restores energy and prevents muscle loss. It helps maintain cell hydration, which speeds wound and burn healing, and helps maintain proper blood glucose and pH levels. Glutamine is an important energy source for the nervous system and one of the most important nutrients for the intestinal system. It can help repair "leaky gut" and ulcers. It is also the primary energy source for the immune system, fueling the cells that fight infection. Glutamine is known to help promote male potency.

Muira Puama

Muira Puama (also known as Potency Wood) is a shrub native to Brazil, used in South America to increase men's libido and maintain erectile capacity. A recent study at the Institute of Sexology in Paris, France, found Muira Puama to be more effective than Yohimbine for erectile problems. Yohimbine is an alkaloid taken from the bark of the Yohimbe tree and is found in nearly all male enhancement supplements. Yohimbine can produce numerous side effects such as, anxiety, panic attacks, elevations in heart rate and blood pressure, dizziness and headaches. Muira Puama is a safe and effective natural alternative to Yohimbe containing products.

Tribulus Terrestris

Tribulus Terrestris is an herb more commonly known as "Puncture Vine". Tribulus is grown in various parts of the world and is known for its virilizing effects. It has been used for centuries in Europe to stimulate hormone production (e.g. testosterone, luteinizing hormone...). It is a safe alternative to synthetic steroidal drugs. Clinical studies in Bulgaria, conducted by the Chemical Pharmaceutical Institute, showed improved reproductive functions, including increased testosterone levels and increased sperm production. Tribulus contains important metabolites like flavonoids, alkaloids, and glycosides which have a stimulating effect on the immune system, sexual and reproductive systems, as well as improving muscle building, stamina, strength and endurance.

[THOR-Plex™ continued]

Damiana

Most traditional cultures of the world have herbs with a reputation for increasing libido and promoting male potency, Damiana is one of them. Damiana's reputation as an aphrodisiac is so well known; it is carried into its botanical name: *Turnera aphrodisiaca*. Alkaloids of the plant seem to have a testosterone-like action. Damiana is a native shrub of North America and Mexico discovered by the Aztecs. It has been used in the US as an aphrodisiac since 1874. It is also used in England, Germany, and Holland for its sexual enhancing qualities and positive effect on the reproductive organs.

Saw Palmetto

Saw Palmetto is a small plant native to North America. The berries of the plant have a long standing reputation as an aphrodisiac and sexual stimulant. It has a therapeutic effect on the urinary tract and the prostate. Saw Palmetto helps prevent testosterone from converting to dihydrotestosterone (DHT), the hormone thought to cause prostate cells to multiply, leading to an enlarged prostate.

Panax Ginseng

Panax Ginseng is the most widely recognized plant used in traditional medicine and is the most famous of the oriental herbs. It has been used effectively for several thousand years. The word panax is derived from the Greek word panacea meaning "all healing". Panax Ginseng normalizes physical functioning depending on the needs of the individual. Its most common use is to increase energy. It is also used to stimulate the immune system, improve performance, enhance memory, and reduce the effects of stress. For centuries, men have used this herb to remedy impotence and improve sexual function.

THOR-Plex™ - The Safer Alternative

- THOR-Plex™ does not contain any additives, artificial colors or flavors.
- THOR-Plex™ does not contain any alcohol, which can suppress libido.
- THOR-Plex™ does not contain any animal organs or hormones.
- THOR-Plex™ does not contain any Yohimbe, which can cause unpleasant side effects.
- THOR-Plex™ does not contain any drugs¹, which can cause severe health problems.
- THOR-Plex™ does not contain any DHEA - which may suppress natural testosterone production.
- THOR-Plex™ does not contain any Licorice Root, which can reduce testosterone levels.
- THOR-Plex™ does not contain any heavy metallic minerals, which can cause toxicity.

THOR-Plex™ is an effective combination of supplements that work together to provide a complete male enhancement formula. THOR-Plex™ is encapsulated in pure vegetable capsules (no gelatin) that dissolve easily for maximum absorption and do not require additives² such as binders or disintegrants found in tablet formulas.

¹ Note: Prescription drugs can have side effects that include visual disturbances, headaches, heart attacks, and even death.

² You may obtain a Special Report regarding additives (FREE with any purchase) titled: "Supplement Additives: A Special Report on 16 Undesirable Additives Commonly Found in Nutritional Supplements." Simply ask for this informative report when placing your order.
